

## MySQL exercise 3 – Basic SQL queries

### General instructions:

In this section, you will work on the IMDB database.

You will phrase a single query to answer each of the following questions. Make sure you write the simplest query possible. You are not allowed to create views.

Do the following for each question:

- a. Write down the query you run.
  - b. Describe in a comment what results you got.
1. What are the full names of the actors in the DB? Order them alphabetically.
  2. How many movies are there?
  3. How many action movies are there?
  4. How many non-action movies are there?
  5. How many movies came out in each year?
  6. How many movie titles have the word “the” in them?
